

European WEEE Regulation 2012/19/EU

Collection and Recycling Arrangements in the United Kingdom

Pall Europe Limited, 5 Harbourgate Business Park, Southampton Road, Portsmouth. Hants, PO6 4BQ

WEEE producer registration number in the United Kingdom: WEE/HG0078UU.

Under the **UK Waste Electric and Electronic Equipment (WEEE) Regulations (2013)**, Pall provides arrangements for the collection, treatment, recycling and recovery of any electric and electronic equipment bought new from Pall, when at the end of its life that equipment finally becomes waste. Waste electrical or electronic equipment of this type is referred to as WEEE.

Pall drives for very competitive pricing on all our products. Therefore, when these requirements were introduced, instead of increasing the prices of our products, Pall decided to share these environmental costs with our customers. Because, Pall believes in being transparent with you on any environmental costs, please be aware that our approach to these environmental costs is:

- Pall pays for the costs of treatment, recycling and recovery of the WEEE to meet the targets set by the WEEE Regulations;
- Pall pays for the costs of data management and reporting to the Environment Agency to demonstrate compliance with all administrative requirements of the WEEE Regulations;
- The user pays for transportation of his WEEE to Pall's appointed recycler in the UK.

Pall has a recycling contract with the 'Thinkstep Compliance Ltd' scheme operator / B-2B WEEE and covers any costs of treatment, recycling and recovery of the equipment on arrival at the designated Thinkstep facility in the UK. WEEE that arises from the purchase of Pall devices is classed as non-hazardous waste based on the materials of construction employed by Pall in its manufacture – unless otherwise indicated on the product label. However, if as the result of use the equipment has been contaminated with a 'hazardous' substance, please dispose of the equipment in line with the hazard present.

As indicated, it is your responsibility to arrange and pay for costs of collection and transportation to the Thinkstep recycler. In order to meet UK Duty of Care Regulations for waste disposal, you must use an appropriate waste carrier who holds a valid Waste Carriers licence.

For larger quantities of waste, you may want to contact the recycler directly to arrange and pay for alternative collection arrangements. The Pall recycler in the United Kingdom is:

M.D.J. Light Bros, Unit 19 Cliffe Industrial Estate, South St Lewes, East Sussex, BN8 6JL

In addition, please remember to comply with the UK Duty of Care Regulations in respect of the transport of waste to the recycler, the shipment must be accompanied by suitable documentation. You must also keep a signed copy of this documentation for two years.

In order to enable Thinkstep to identify Pall equipment upon arrival at the recycler's address, please download the 'Recycling Label for UK Customers.' Complete the label with your company details and attach it to a suitable box for transport to the recycler.

Recycling Label for UK Customers:

WEEE Reporting Recycling Data for Pall Equipment in the United Kingdom

Under Section 27 of the WEEE Regulations, information on the quantities and categories of Pall electrical and electronic equipment put on the market, reused, recycled and recovered within the UK must be reported at the end of each compliance period.

B2B WEEE will prepare the recycling data report for Pall.

Pall thank you for your participation in this key recycling endeavour
