

Pall Services for Small Communities

Filtration Solutions for Drinking Water Applications

Let Pall's Water Processing team develop a custom plan to meet your community's needs.

If you need to expand your existing water filtration system, or upgrade it to meet regulatory requirements, such as the Long Term 2 Enhanced Surface Water Treatment Rule, you could benefit from the expertise of Pall Corporation's engineers and scientists.

From initial water quality assessment to full scale system installation and regulatory approval, Pall's Water Processing team can provide you an unparalleled array of services. We can:

- Help clarify EPA regulations and offer compliance strategies for your community
- Design and install process solutions to remove pathogens to meet stringent drinking water quality requirements.
- Demonstrate our technologically advanced and cost-effective solutions through the use of field trials on pilot and full-scale equipment.
- Upgrade your current water system to meet removal requirements, capacity needs, and redundancy concerns.

Value

- Ensure consistent, high-quality drinking water.
- Ensure public health protection by reducing microbial contaminants.
- Ensure compliance with local and federal water quality regulations.

Is This an Opportunity for You?

- Does the quality of your water meet the Long Term 2 Enhanced Surface Water Treatment Rule?
- Are you planning to upgrade or expand your existing water treatment system?

- Do you need assistance in developing a LT2 compliance strategy for your community?
- Are you interested in an integrity testable membrane system that provides a positive barrier to TSS and microbiological contaminants?
- Do you require assistance with state or local certification?
- Are you interested in an automated water system that can be operated and monitored remotely?
- Are you interested in a water quality assessment or system evaluation?

Key Services

- Water Quality Assessment
- Process Consulting
- Pilot Testing
- Customized Filtration Solutions
- Water System Design and Installation
- Water System Upgrades
- System Certification
- Regulatory Approval Assistance

Why Pall?

- Pall is the established global leader in filtration with over 1500 systems in operation worldwide.
- Pall's engineering group is staffed with qualified engineers who are experts in system design, process optimization, pilot testing, consultation, and regulatory compliance.
- Pall offers proven water system designs that ensure consistent production of high-quality water.
- Pall provides system support from filtration experts with excellent track records for customer satisfaction.
