

Boeing 777-200 / -300 E/E Cooling Filter

Reduced Life Cycle Cost

Pall Aerospace 777 E/E Cooling barrier filters are designed to offer the highest level of protection from particulate matter. These filters offer optimum service life without cleaning. This provides a cost-effective means to maintain high air quality.

Design Features

- Pall Aerospace filters for the Boeing 777-200 / -300 are designed to be a minimum of 99% efficient for particles 50 micron and greater in an airstream at 1500 cfm (sea level).
- Proprietary engineering design ensures minimal differential pressure and maximum service life.
- One piece construction which is directly interchangeable with the existing E/E cooling barrier filter.
- Constructed from lightweight materials.
- Improved protection of avionics equipment.

Boeing 777 -200 / -300 E/E Cooling Filter

Technical Data

Meets or exceeds all aspects of the current filter design.

Pall Aeropower P/N:	CD-01109F2
Description:	E/E Cooling Filter
Boeing Specification:	S210W002-2
Cross Reference P/Ns:	P531709
Weight:	11.03 lbs. maximum
Quantity / Aircraft:	1
Dimensions:	16.5D X 17.5L
