

Pall Filters

V2500 Engines

Improve Fluid Cleanliness | Reduce Costs

The V2500 has logged more than 250 million flight hours and is used by operators around the globe.

As the industry leader in filtration, and the largest and broadest portfolio of OEM approved filter products, Pall was the OEM filter provider since the start of the V2500 program.

By providing the highest level of engine protection available, Pall fuel and lubrication filter elements keep your engines flying and reduce your costs.

Involved from the original filter design through to testing, certification and series production and now in partnership with Satair, Pall continues to support the V2500 engines in-service today.

Pall part #	OE Part #	ATA	Filter Type	Application
QA05954	5R5030	79	Disposable Element	Main Lube, LP Scavenge
QA06234	1011871	---	Flushing Element	Lube, 3µm Green Run, GSE only
