

## Use of Genetically Modified Organisms (GMOs)

This statement is intended to provide information on the exclusion of GMO substances in the manufacture of Pall Corporation disposable pharmaceutical-grade filters, tangential flow filtration (TFF) cassettes, and single-use systems (SUS).

Pall Corporation does not specify or intentionally use any GMO substances in the manufacture of the above listed products. The wetted components (of the above listed products) are constructed from primary materials which are polymeric in nature. However, since the raw materials we purchase are not certified as 'non-GMO', we cannot exclude the possibility that genetically modified material may be present in a trace quantity as an incidental additive deriving from the raw material manufacturing process.

Please contact [dossieradmin@pall.com](mailto:dossieradmin@pall.com) for any additional questions on this subject.

Please check the Pall website regularly for changes or updates. This statement is correct at the time of preparation, however, customers should routinely consult the Pall Corporation website for changes or updates. All products shall be used in accordance with the Instructions for Use (IFU).
