

FBT Series Filter Housings

SINGLE-ROUND FILTER HOUSING

for sanitary liquid filtration

FBT Series

SINGLE-ROUND FILTER HOUSING

Description

FBT Series sanitary housings are designed specifically for liquid filtration in the food and beverage industry¹.

- Enhanced cleanability and microbiological safety due to crevice-free, polished and hygienic design
- Corrosion resistance and durability with 316L stainless steel wetted parts and high-quality welds
- Cost-effective without sacrificing quality and performance

FBT Housings are available in a standard sanitary design allowing a variety of connection options, or in a 3-A sanitary design, which meets the requirements of 3-A Sanitary Standards #10-04.

Features and Benefits

- Suitable for flow rates up to 91 liters/min (24 USgpm) depending on cartridge type and size.
- Suitable for CIP and SIP.
- Beveled housing tube sheet and aseptic-style housing seal provides enhanced drainability and a crevice-free connection between the housing head and bowl.
- Electropolished head and elbows and mirror polished bowl ensures optimal cleanability in critical areas while maintaining cost-effectiveness.
- New cartridge locking design features additional cut-outs to traditional half-moon portions of the Code 7 bayonet locks, enhancing cleanability and drainability, (Figure 1).
- Operator-friendly V-Clamp housing closure simplifies handling.
- Design satisfies EC Pressure Equipment Directive (PED) 97/23/EC, ATEX 94/9/EC Group II Category 2.
