

DECLARATION OF COMPLIANCE **Seitz® AKS4 Filter Sheets**

Seitz AKS4 Series filter sheets are intended for decolorization and deodorization applications including distilled spirits, sweetener and sugar syrups, juice, wine, beer, gelatin, and high alcohol extracts. Additionally, AKS4 sheets may be used to dechlorinate water. These filters comprise a cellulose matrix with natural diatomaceous earth and activated carbon. The sheet material also contains low levels of binder resin, polyolefin fibers and perlite.

The AKS4 filter sheets possess a high adsorption capacity due to a content of about 40 weight percentage of finely powdered activated carbon.

An initial flush is required as detailed in Pall's Instruction for Use (IFU) documentation that accompanies the product, prior to use.
