Statement: Vegan Materials Statement
Product: Seitz K 100 200x200 Part. Nr.: B07874

Dear valued customer,

Based on our internal evaluation of materials used within the Bad Kreuznach sheet manufacturing facility, there is no known risk of direct or cross contamination with any animal derived material.

Suppliers providing raw materials utilized for the production of sheet based filters or support sheets shall certify that current and future shipments of the material meet the requirements of the Pall Global Disallowed & Controlled Substances document, as invoked on the Pall purchase order by completion of a Pall QA0270 form or provide a written Declaration of Conformity.

Materials of construction are detailed on each food contact [Declaration of Compliance](#) for filters sheet. A [PSDS for filter sheets](#) is available for specific information regarding materials of construction, percentage composition, stability and reactivity. The following information is also made available: toxicological; ecological; and disposal guidance. Additionally, we can confirm polyolefin fibers recycled within the process do not contain animal derived materials.

Issue Date: May 20th, 2026

Expiry Date: May 19th, 2028

We hope you find this information helpful.

Yours sincerely

Pall Filtersystems GmbH
Bad Kreuznach
