

## New: Retrofit for GEA Refrigeration Technology Filter Element

### Introducing Pall's 'direct replacement' filter technology for users of GEA filters in compressor lube oils

Pall's new retrofit products allow users of other manufacturers' elements to benefit from Pall technology without the need to replace the existing housing/vessel. Pall retrofit products are direct replacements for existing elements, offering the performance and value you have come to expect from Pall.

#### Advantages of Pall Technology

Pall's filter media and element designs bring together industry leading technologies and advanced manufacturing processes to deliver unsurpassed performance and value in each and every element.

#### Element Drawing

**Pall Retrofit p/n: RGEFS614GF10V**

**Replaces: GEA p/n: 03249-001-1-01-01-R483**

#### Specifications:

- Available in Fan or LOP configuration
- Out-to-in flow direction
- 10 micron nominal rating
- Microglass medium
- Max differential pressure: 50 psi (3.45 bar)
- Max Temp: 200°F (93°C)
- 304 stainless steel end caps and core
- Nitrile Gasket

#### Global Presence – Local Support

Pall is a global company with offices in Asia, Americas, Europe, and the Middle East. This global presence gives us the ability to provide local commercial or technical support whenever or wherever there is a customer need.
