

**Subject: REACH Regulations (EC 1907/2006) and amendments in respect of SVHC levels in articles and materials supplied by Pall**

**General Information on SVHCs:**

In relation to the candidate list of substances listed for 'Authorization', and those substances on the 'Authorized' lists currently issued by ECHA (herein referred to as SVHCs), and based on current knowledge of the materials of construction of Pall products, we can state the following:

- We do not anticipate any of the SVHCs to be present at a concentration of greater than 0.1% (w/w) in most 'articles' produced by Pall. Where they are present we will communicate the presence of any candidate listed or authorized SVHC if above 0.1% in 'articles' provided to our customers in the EU.
- For substances and mixtures EU format SDSs will include any candidate listed or authorized SVHC if above 0.1% or where considered hazardous.
- 

This activity is subject to regular review in relation to any changes to the above, including review of further SVHCs as they are added to the Candidate lists.

**General Information on REACH Registration:**

The REACH regulation (EC) number 1907/2006 stands for Registration, Evaluation, Authorization, and Restriction of Chemicals.

The REACH regulations potentially affect all European companies - whether they are substance manufactures or importers, formulators of chemical mixtures, article manufacturers, or downstream users. While directly applicable to Europe, it also impacts on companies outside of Europe wishing to supply their products into Europe - or where they are a supplier to a company wishing to do so.

Pall Corporation is primarily a manufacturer of 'articles'. We directly import some substances in to Europe requiring REACH registration by a Pall entity. Those substances which were in scope of the REACH 1 June 2013 Registration deadline have already been appropriately addressed by the proper Pall entity. Any remaining Registrations as appropriate to their quantity will be complete by 1 June 2018 in line with our intent to meet all applicable European Chemicals Agency (ECHA) deadlines.

Prepared by Pall Quality Assurance and Regulatory Affairs

Date of Issue: 20 January 2017
