

Subject: Recommended Shelf Life of Pall Food & Beverage Filter Products

Product(s): Pall Food & Beverage Cartridge Filters and Sheet based filter products ('W'-Code)

General information: Recommended shelf-life and storage conditions

Pall recommends a customer shelf life of

- 5 years from the date of manufacture of 'W'-code cartridge filters
- 3 years from the date of manufacture of Seitz® depth filter sheets and sheet based filter products (SUPRApak™ and SUPRADisc™ modules)

when the following storage conditions are maintained.

- Store at a temperature between 5 and 30 °C (41 and 86 °F) in dry conditions
- Do not expose to direct sunlight, radiation or direct weather conditions
- Store in original shipping bag and boxing
- Exercise care during handling to avoid physical damage. Ensure shipping bag and any seals are intact prior to use. Plastics can be damaged if roughly handled, particularly at sub-zero temperatures. Thermal shock by quickly raising the temperature from subzero conditions should also be avoided.
- Visual inspection of packaging and product and, where appropriate, integrity testing is recommended prior to use. Do not use damaged articles.

For conditions outside the above or questions related to correct storage please contact Pall for further advice.
