

## Melamine and Pall F&B Filter Cartridge Products

In response to the global focus on to reduce or eliminate sources of "Melamine" (2, 4, 6-triamino-1,3,5--triazine, CAS # 000108-78-1) in food, food producers as part of their overall risk reduction plans may wish to identify any potential sources of Melamine in contact in materials which are in direct contact with their products.

For all disposable filter products, intended to be used in contact with food or beverages, Pall actively gathers information from its suppliers on controlled and disallowed substances, including Melamine. For the latest information on these substances please refer to the E-962 document on Pall.com.

<http://www.pall.com/main/about-pall/quality-at-pall/supplier-information.page>).

The table below is intended to assist food producers in identifying Pall filters in our food contact compliance program, which are constructed using materials where, based on our supplier's feedback, there are no known potential sources of Melamine. The table below details the type of cartridge filter, the product family, an example part number structure and, a link to the declaration of compliance.

Additional food contact compliance documentation is available on the Pall website (<https://food-beverage.pall.com/compliance-and-safety>).

<b>Product Family</b>	<b>Example Part Number Structure</b>	<b>Declaration of Compliance</b>
<b>Air/Gas Service Membrane Filter Cartridges</b>
